

PROFILE SUMMARY

- Innovative Software Engineer with experience in **full-stack development**, Gen Ai, ML, and real-time application design
- Built projects involving multimodal inputs, **LLM-based features**, and efficient backend services
- Developed **Reva AI**, integrating voice, image, and text processing with real-time streaming and contextual memory
- Skilled in building scalable APIs, microservices, and user-focused **App/web** applications using modern frameworks
- Passionate about creating reliable , intelligent, and impactful software products

EDUCATION

Vivekananda Global University, Jaipur, Rajasthan | Aug 2022 – May 2026

- **B.Tech, Computer Science and Engineering**

EXPERIENCE

Software Engineering Intern | JPMorgan Chase & Co., Remote, India | Dec 2024 – Jan 2025

- Developed Spring Boot microservices processing **transactions**
- Reduced API latency by **15%** using optimized Kafka pipelines
- Delivered 5+ production features in Agile sprints

Full Stack Development Intern | Webstack Academy, Remote India | Feb 2024 – Apr 2024

- Built a full-stack AI-powered travel app with **React.js, Tailwind CSS, Node.js, Express.js, MongoDB**,
- Built an AI-enabled travel app with real-time weather, routing, and APIs.
- Implemented group chat with WebSocket, handling **500+ concurrent users**
- Achieved **92% user retention** with responsive UI and secure authentication

PROJECTS

1.Reva Ai Search Engine | Full stack developer | Personal Project | Setp 2025 – Nov 2025 | [LIVE](#) | [Github](#)

- Built a full-stack multimodal AI system using **React, FastAPI, MongoDB, TailwindCSS**, supporting voice interactions, **Text inputs** and **image Generation**
- Engineered an **ML** pipeline (PyTorch, Diffusers, Transformers, HuggingFace, OCR stack) achieving **90% accuracy** in query augmentation & content extraction
- Integrated real-time **voice conversation** mode, using STT/TTS pipelines and GPT/Mistral/Falcon models with web sources (Wikipedia, CommonCrawl, DuckDuckGo) to deliver **high-accuracy, natural AI** dialogues
- Implemented **low-latency streaming APIs** (WebSocket, aiohttp) with contextual memory, resulting in **40% faster** responses and **90%** improved relevance
- Added advanced features including **code generation, text-to-image (TTI), text-to-speech (TTS), debugging, and file/document analysis**, and secured the system with **JWT authentication + email verification** workflows

2.LyVON: Premium Shoes Platform | Full stack developer | Personal Project | Jul 2025 – Aug 2025 | [LIVE](#) | [Github](#)

- Developed a **full-stack e-commerce platform** for luxury footwear using **React.js, MongoDB, TailwindCSS, FastAPI**
- Added an **AI-powered recommendation system** suggesting products by category, size, name, and cart contents, increasing **average cart size by 25%** and **session duration by 40%**
- **Checkout & Order Management:** Developed multi-step checkout supporting Razorpay, UPI, credit card, and COD, with shipping validation and persistent cart/wishlist , reducing cart abandonment by 20%.
- **Admin Dashboard:** Architected a full-featured dashboard for product, order, and inventory management, supporting **CRUD** operations, low-stock alerts sales analytics, streamlining admin workflow by **50%**
- **AI Assistant (Text + Voice):** Integrated an AI-powered conversational assistant with real-time voice calling, improving engagement by **45%**, response accuracy by **35%**, and reducing manual support load by **40%**

3.Airline Management Web | Coding Club, IIT Guwahati, | Jan 2024 – Feb 2025 | [LIVE](#) | [Github](#)

- Constructed a full-featured airline management platform with MERN stack, enabling 500+ concurrent users to search flights, input personal details, create accounts, and book single or multiple tickets in one transaction.
- Integrated Razorpay for secure payments with automatic ticket generation and MongoDB storage, processing bookings with **99%** success rate
- Created an admin panel to manage flights and bookings, supporting add, view, edit, and delete operations, improving database efficiency by **20%**

SKILLS

- **Languages:** Java, Python, C++, JavaScript, TypeScript, SQL
- **Frontend:** React.js, Tailwind CSS, React Native, NativeWind
- **Backend:** Node.js, Express.js, FastAPI, REST APIs
- **Databases:** MongoDB, MySQL, H2 Database
- **AI/ML:** GenAI, LLMs (GPT, Mistral, Falcon), OCR, RAG, Vector Search, CLIP, FAISS, PyTorch, NumPy, Pandas, Matplotlib
- **Tools:** Kafka, Git, GitHub, WebSocket, aiohttp, Postman, Linux, Google Colab, Kaggle
- **Methodologies:** DSA, Microservices, Real-Time Data Processing, TCP/IP, OOP, Fine-Tuning

RELEVANT COURSEWORK

- **Computer Science:** Data structure and algorithms, Data analytics and algorithms, Operating System, DBMS, Data visualization, Data Mining , Prompt Engineering
- **Mathematics:** Linear Algebra, Real Analysis, Complex Analysis, Differential Equations

ACHIEVEMENTS & ACTIVITIES

- Solved **500+ DSA problems** on [HackerRank](#) and [GeeksforGeeks](#) improving problem-solving efficiency and algorithmic thinking
- **Completed the Walmart Advanced Software Engineering Virtual Experience** on Forage, focusing on Advanced Data Structures, Software Architecture, Relational Database Design, and Data Munging.
- Achieved Top 3 Position in "Code Red 2.0" coding competition at college
- **Completed the Accenture Developer & Advanced Engineering Virtual Experience** on Forage, gaining hands-on skills in Object-Oriented Programming, Agile Planning, Continuous Integration, and Code Refactoring
- **Actively Participated In Hackathon & Graphic Designing**
- Led the college graphics designing team, inorganic and managing various designing projects and events enhancing the teams creative output and visibility
