

EDUCATION

Vivekananda Global University, Jaipur Rajasthan, India | 2022-26 | *CGPA- 8.9*
- B Tech Computer Science and engineering

SKILLS

- **Programming Languages:** Python, JavaScript, Java, SQL
- **Backend Development:** Node.js, Express.js, FastAPI, REST APIs
- **Databases:** PostgreSQL, Vector Databases (pgvector), Redis
- **ML & AI:** Machine Learning, Deep Learning, LLMs, RAG, AI Agents, Prompt Engineering
- **Cloud & DevOps:** AWS (EC2, S3), Docker, Kubernetes, Terraform, GitHub Actions (CI/CD),
- **Streaming & Systems:** Kafka, WebSockets, Real-Time Processing, Elastic Search
- **Computer Science:** DSA, OS, CN, OOP, TCP/IP, Distributed Systems, Unit Testing, SDLC, Linux
- **AI Tools:** Copilot, Claude, ChatGPT, Cursor ai

EXPERIENCE

Full stack Developer - Sprinto Technology | Bengaluru | Jun 2025 – Dec 2025

- Led end-to-end **design and development** of **15+** production APIs handling **~20k–50k req/day** across distributed services
- Reduced latency by **~60% (500ms → 200ms)** under concurrent load by introducing **async processing and optimized request pipelines**
- Designed and deployed **real-time event-driven systems (WebSockets)** supporting concurrent user workflows
- Implemented **secure authentication & authorization (JWT, RBAC)** for enterprise-grade compliance systems
- **Diagnosed and resolved critical production incidents**, improving uptime to **~99.5%** and reducing failure rates under peak traffic
- Improved CI/CD pipelines, enabling **faster and more reliable deployments in production environments**
- Collaborated with cross-functional teams in Agile environments to deliver backend features end-to-end

Full Stack Development Intern — Webstack Academy | Feb 2024 – Apr 2024

- Built AI-based platform with **real-time features**, achieving **~92% user retention**
- Developed **WebSocket-based chat system** supporting concurrent users with low latency
- Integrated third-party APIs (maps, weather, routing) to enhance product functionality
- Implemented **WebSocket-based real-time group chat** with file sharing and live indicators
- Improved user retention to 92% through responsive UI and secure authentication

PROJECTS

Reva Ai- Multimodal Ai Search Engine | Full Stack Project | Sept 2025- Dec 2025 | [Live Demo](#) | [GitHub Repo](#)

- Built **Agentic AI system using LLMs (GPT, Mistral)** for multimodal interaction
- Designed ML pipelines using **PyTorch, Transformers, HuggingFace**, achieving ~90% accuracy
- Developed **real-time streaming APIs (WebSockets, aiohttp)** for low-latency responses
- Integrated live data sources (Wikipedia, DuckDuckGo, CommonCrawl)
- Implemented features like **code generation, text-to-image, voice AI (STT/TTS)**
- Focused on scalability, response optimization, and distributed processing, Secure Auth via JWT And Email Verification

LyVON - Cloud-Native Microservices Deployment on AWS EKS | Jul 2025 - Aug 2025 | [Live Demo](#) | [GitHub Repo](#)

- Architected and operated **distributed microservices** on **AWS EKS (Kubernetes)** with **HPA auto-scaling, ALB ingress, and zero-downtime rolling deployments**, supporting high-traffic production workloads
- Built **infrastructure-as-code with Terraform** to provision **EKS, Redis (ElastiCache), SQS, IAM**, and networking, ensuring reproducible and secure cloud environments
- Implemented **CI/CD pipelines using GitHub Actions**, automating **tests (Jest), Trivy security scans, Docker builds**, and **Kubernetes deployments**
- Optimized services by supporting a **content-based recommendation system** with **Redis caching and async SQS processing**, achieving **sub-50 ms latency** and reducing **database load by ~80–90%**
- Established **end-to-end observability with Prometheus and Grafana**, monitoring **latency, RPS, pod health**, and infrastructure health to improve reliability and MTTR

Zyra - AI Powered Personalized News Platform | Full Stack Mobile App | Dec 2025 - Jan 2026 | [GitHub Repo](#)

- Developed a **full-stack AI-powered news platform** using **React Native and FastAPI**, featuring personalized feeds, offline support, secure **JWT-based authentication** and **Protected API Routes** with low-latency data access
- Implemented **semantic search and AI summarization** using **Sentence Transformers and pgvector**, enabling context-aware retrieval across thousands of news articles.
- Built a **scalable async backend** with **PostgreSQL and SQLAlchemy**, including automated RSS ingestion, de-duplication, and category inference
- Optimized user experience with **offline-first caching**, pull-to-refresh feeds, saved articles, and interest-based content ranking

ACHIEVEMENTS & CERTIFICATIONS

- Built [LLM Project Store](#), an open-source collection of production-grade RAG, multi-agent, voice AI, and multimodal LLM applications
- Solved **500+ DSA problems** on [HackerRank](#) and [GeeksforGeeks](#)
- **Top 3 – Code Red 2.0** Coding Competition
- Walmart **Advanced Software Engineering Virtual Experience** ([Forage](#))
- Accenture **Developer & Advanced Engineering Virtual Experience** ([Forage](#))
- Led college **graphics design team**, managing multiple technical and event projects
